

**THE MOST COMPLETE LOCATION DATABASE**  
The ReCount Database includes all of the major chains and more independent locations than any other database.

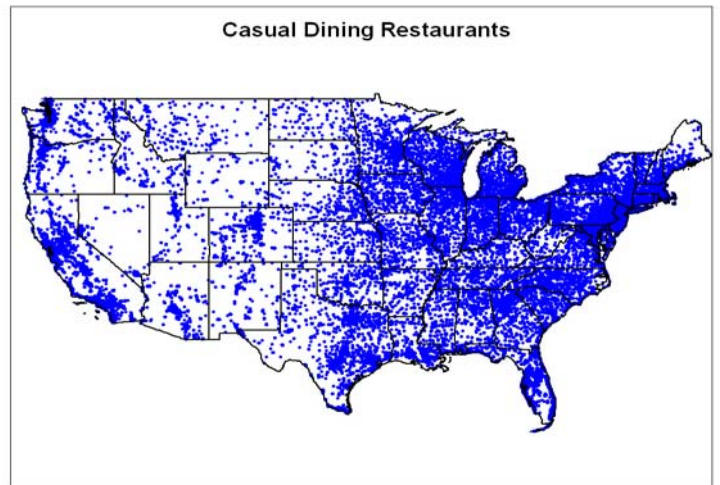

**TRADE AREAS**  
Our unique methodology determines the most accurate trade area for each location based on key variables. Trade areas are created as polygons compatible with major GIS platforms.

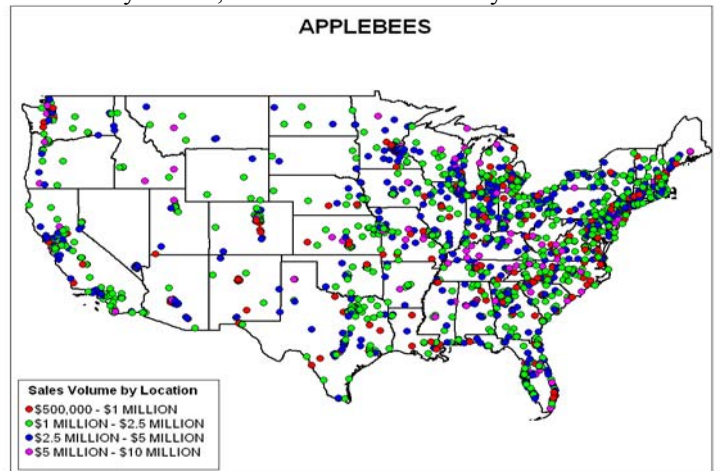

**DETAILED DATA WITH EACH RECORD**

When you purchase the ReCount database, you get more than names and addresses. The database includes category, chain type, sales estimates, employee counts, and much more. The data can be provided in a number of file formats for spreadsheets and databases.

**LOCATIONS FROM COAST TO COAST**  
The ReCount database covers the entire United States. Select records by market, state or the entire country

**SALES VOLUME**  
Each restaurant location in the ReCount database includes an accurate and up-to-date estimate of sales volume. Our sales information is consistently verified to ensure accuracy.
